

Gentlemen,

I am station manager of WRFR-LP in Rockland, Maine.

We are working hard to get on the air.

We have spent about \$10,000 so far and have our audio gear,
our transmitter, our tower and antenna, etc.

The cost of the EAS receiver will be a serious obstacle for us.

We are eager to do a good job of community service with the license you have
given us.

Please consider some action that will reduce the cost of our EAS compliance.

Thank you,

Joseph Steinberger

WRFR-LP
